07/ INTERVIEW
I conducted user interviews to understand user's decision-making process, frustrations, and expectations when selecting and visualizing furniture. These insights helped shape Roomify's features, ensuring the app solves actual user problems rather than just offering standard AR visualization.

OLENA KOVALENKO
Homeowner
I always worry about whether the furniture will fit or match the rest of my interior. I need a tool that gives me confidence before I make a purchase.
ANNA PETRENKO
Interior designer
A safe, anonymous forum where users can share experiences, offer support, and learn from each other's wellness journeys.
DMYTRO SHEVCHENKO
Furniture store manager
Managing a large inventory is challenging. If I could showcase full catalog virtually, it would save space and offer customers more choices.

03/ DESIGN PROCESS
I developed a process inspired by Design Thinking principles, tailoring it to the project's unique needs. This approach allowed me to deeply understand user goals, design impactful features, and refine them through iterations, ensuring the app is intuitive and user-centered.

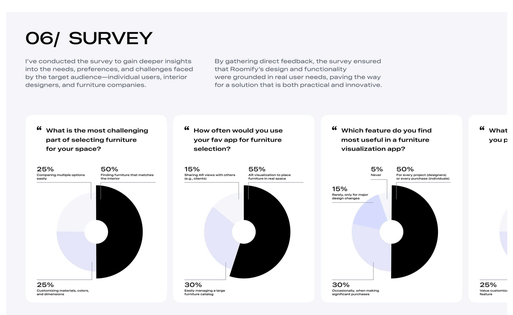
Let's get started



06/ SURVEY
I've conducted the survey to gain deeper insights into the needs, preferences, and challenges faced by the target audience—individual users, interior designers, and furniture companies.
By gathering direct feedback, the survey ensured that Roomify's design and functionality were grounded in real user needs, paving the way for a solution that is both practical and innovative.
What is the most challenging part of selecting furniture for your space?
How often would you use your fav app for furniture selection?
Which feature do you find most useful in a furniture visualization app?
